Platforms

Shopify · Liquid · OS 2.0 · WordPress · ACF · WooCommerce · Magento 2

Languages & tools

PHP · JavaScript · React · HTML5 · CSS3 · Bootstrap 5 · MySQL · Figma · Git

Strengths

- Figma to pixel-accurate builds
- Conversion-focused landing pages
- Core Web Vitals and speed tuning
- Client-editable sections and blocks

Education

Master of Computer Applications (MCA)

Profile

E-commerce developer with 4+ years building and customising Shopify and WordPress stores. I turn designs into fast, responsive storefronts — custom Liquid themes, Online Store 2.0 sections, ACF-driven WordPress sites and WooCommerce builds — structured so clients can manage content without code.

Experience

Shopify & WordPress Developer
Jun 2023 – Present

Zero Gravity Communications, Ahmedabad · Full-time

- Build and customise Shopify stores: custom Liquid themes, OS 2.0 sections, metafields and third-party app integrations.
- Develop WordPress sites with custom themes, ACF flexible layouts and WooCommerce, plus ongoing performance optimisation.
- Convert Figma designs into pixel-perfect, responsive, conversion-focused storefronts and landing pages.

JavaScript Developer
Jan 2023 – Jun 2023

Felix-IT Systems, Ahmedabad

- Built interactive front-end features with JavaScript and React, focused on clean OOP structure.
- Created database tables and modules, and worked on re-branding components.
- Handled UI implementation and web design from layout to working interface.

Internship Trainee
Jan 2022 – Dec 2022

Magneto IT Solutions, Ahmedabad · Full-time

- Developed Magento 2 custom modules and re-branding modules.
- Front-end development and CSS, converting Figma layouts into responsive HTML.
- Supported database administration and website design tasks.

What I deliver

Custom Shopify themes
Liquid themes and reusable OS 2.0 sections driven by metafields.

CRO landing pages
Fast, mobile-first product and campaign pages.

WordPress + ACF
Custom themes with flexible, client-editable content blocks.

WooCommerce stores
Products, cart, checkout and payment gateways, on-brand.

Performance
Lazy loading, asset optimisation and Core Web Vitals fixes.

Magento 2
Custom modules and storefront re-branding.
